DON'T LIKE THE NON-INTERCOURSE POLICY.

A gentleman from St. George, extensively engaged in farming and stock raising in Washington county, Utah, and now in this city, says the people of St. George are more anxious for frequent and rapid communication between that place and Pioche than we are. He says the non-intercourse policy enjoined by Brigham Young meets with but little favor from the farmers of Southern Utah—that their best and only profitable markets are in the mining districts of Lincoln county—and that they will be found to second, with great unanimity, any movement looking to a closer commercial alliance. He thinks a direct stage line should be established between Pioche and St. George, carrying the U. S. mail at least three times a week, and hopes petitions therefor will be circulated here immediately, and then sent there for circulation. He further says the Mormons of Washington county have no notion of joining an exodus to north-eastern Arizona, the South Sea Islands, or any other place; that they are happy, contented and prosperous where they are, and intend there to remain, cultivating the friendship and inviting the patronage of their Gentile neighbors. This gentleman is a prominent Mormon, and an intelligent and liberal minded man, but as he expressed an aversion to newspaper notoriety, we will withhold his name.

BEARING FRUIT.—The efforts we have been making, for the last six weeks, to awaken the parents and friends of education in Pioche to the necessity of providing larger, healthier and more convenient school accommodations have not been, we are gratified to know, altogether fruitless. Influential citizens are now agitating the question of erecting a \$10,000 school edifice, the building fund to be raised by special tax, as provided in the school law. Why not propose \$15,000 as the amount, and erect an edifice that will meet the public requirement and be a credit to the city for several years? With a present school-going population of over two hundred, which is constantly increasing, it seems to us that it would be expedient, to erect a first-class building. We hope no temporary makeshift scheme will be entertained. Give us a fine, two-story school house. We concur with the views of "Education," in this issue.

THE SCHOOL MEETING TO-NIGHT.—If parents, and citizens generally, knew how pleasant and interesting the school meeting was last Saturday, we are confident the school house would be filled to its utmost capacity to-night. Special arrangements have been made for the accommodation of lady auditors. Several prominent citizens are expected to deliver speeches. Propositions of importance, we are told, will be submitted for consideration, relating not only to school but other matters of public moment. We hope to see a good attendance.

THE SCHOOL-GOING POPULATION.—Col. O'Dougherty, who is manifesting commendable zeal in trying to place our educational interests on a more satisfactory footing, has made a careful examination of the school-going population of Pioche, and finds that we have in our midst 210 children between the ages of six and eighteen. To accommodate these youths we have a school house as small as an ordinary family parlor.

MR. LANE'S INDICATOR.—Those who think Mr. Lane's hoisting-works indicator is not an original mechanical conception are mistaken. Its construction is entirely different from anything of the kind heretofore in use. An indicator has been patented, with a dial and distance-hand attachment, but it will not bear practical testing. Mr. Lane's invention is all utility.

MINING MEN will bear in mind that we to-day collect facts for our regular Weekly Mining Review, which will appear in our next issue. The hill-sides are very muddy at the present time, and it will be impracticable, probably, for the reporter to visit all the leading mines. Written facts will be received at this office until 3 o'clock in the afternoon.

NEW SCHOOLHOUSE.

Editor RECORD: I understand a public meeting will be held this evening, at the district school house, for the purpose of taking into consideration the propriety of taking initiative steps to secure the erection of a new public school building in Pioche, the amount required to be raised by levying a special school tax on property within the limits of the school district. The fact that a new building is sadly—yes, shamefully—needed, no one for a moment doubts, and although but comparatively a stranger here, I am nevertheless a taxpayer, and for one will cheerfully and gladly respond to any reasonable amount for so laudable an object. I have contributed towards building two suitable structures in this State for educational purposes, and for the third time it appears to have fallen to my lot to contribute my mite in that direction.

I learn that a proposition will be made this evening to fix the amount to be raised for the purpose indicated at \$10,000. If a schoolhouse is to be built at all, let us have one that will amply accommodate all the children in the district—there being, I understand, 210 between the ages of 6 and 18. I will give, for example, the school building in Carson City, completed some three months since, the building of which, costs \$9,000. I mean the building, without the furniture. That was the contractor's price. It is 70x100, two stories high, partitioned off so as to accommodate the different classified grades. According to the State School Superintendent's biennial report, there are about the same number of children in attendance at school as in Pioche. Considering that building material is over fifty per cent. higher here than in Carson, a much larger sum of money will be needed to construct a similar building to accommodate an equal number of children. Fifteen thousand dollars, at least, should be considered for the cost of construction. Ten thousand will be found inadequate, if a creditable undertaking is hoped for.

Let there be a general turn out this evening, in order that the good work may speedily be begun. We have a Court-house that is a credit to any county, east or west, and now we need a school-house that will be an honor to the tax-payers at home, and an established educational fame abroad.

THEATER.—A good house assembled last night to witness the second representation of "Colleen Bawn," and everything passed off well. Mr. Bates entered into the spirit of Miles Na Coppaleen; he understands the character thoroughly. It would be better for some of the performers who assume the Irish accent to let it alone; when they cannot do it well, let them speak naturally. The Cave scene was again encoored, and deservedly. Lindsay was excellent in Danny Mann. To-night a double bill will be given. Mr. Bates will appear in his great specialty, "Toodles." "Whoever has seen him in "Ecceles," "Simon Lullaby," etc., can imagine the treat that is in store in his impersonation of "Toodles." Other novelties are in active preparation. To-day a matinee will be given for families and the "Colleen Bawn" will be the attraction. The little ones so enjoyed themselves last Saturday that we trust to see the house crowded on the occasion.

ABSCONDED.—Some time yesterday morning, before daylight, a Lacour street courtman, for whom one man had an attachment, and we don't know how many more, passed beyond the city limits, and is now supposed to be hunting some retreat where men do not press their attachments so vigorously. It is said he walked out of town, and got on the stage when it overtook her. Her "victims of misplaced confidence" are not a few.

PLANTING AN ORCHARD.—At Bennett's Springs, about ten miles south of Pioche, on the road to Hiko, an enterprising ranchman, whose name we could not learn, is planting an extensive orchard of apples, peaches, pears, etc. He has also a large extent of ground planted in small fruits, blackberries, raspberries, currants and gooseberries. The location is said to be favorable for the enterprise.

RICH ORE.—We were last evening shown some very rich ore from the Khe-dive mine. It is the genuine chloride ore, and assays from twelve to fifteen hundred dollars to the ton. It came from a vein-body a foot in width; but the ledge proper, it is claimed, is twenty feet in width. This mine has just been incorporated, and development will soon begin and be prosecuted with vigor.

MUCH SNOW TO MELT YET.—Yesterday was warm and summerlike, and the snow melted rapidly, the water flowing down Main street in torrents all day. But it will require two or three weeks of such weather to carry off all the snow on the cliffs above the city. It is still very deep a half a mile above town, and becomes deeper in ascending until the summits are reached.

A GOLD NOTE BANK.—We have heard it suggested that certain California capitalists intend applying for a charter for a gold note bank in Pioche; but the information is not from a source of known responsibility. We are satisfied such a corporation will be in operation here, ere long, but prefer that its personnel shall embrace home operators.

THE CONDITION OF THE STREETS in the vicinity of the Court House is disgraceful to this and would be to any other town. Is there no way to improve them? The Commissioners will be in session next Monday; some teamster may, by going before them with a proposition, get a job hauling broken rock. Try it, some one.

GOOD SHOT.—A miner named Jennings, temporarily disabled in one of his hands, went out to try his fowling-piece yesterday forenoon, and returned with four sage-hens—bagged at a single shot. He scared them up on the foot-hills, about six miles out. Pretty good for a one-handed sportsman.

FROM WALLPACI.—More arrivals from Wallapai yesterday. New and rich discoveries are reported about ten miles northeast of Mineral Park. Our informants will return in a few days.

LAST year we had very little winter until this time; but this year we have, so far, had enough winter to have satisfied a Laplander. Therefore many think we will in the future be favored with mild weather—on the principle, we suppose, that the angry elements have exhausted themselves.

COMPLAINT is made that a portion of the narrow-gauge has been torn up, and the irons and ties used to bridge mud-holes on the Bullionville road. Not right; but it is certainly time the narrow-gauge was doing something towards facilitating the transportation of ores to the mills.

RUSHING BUSINESS.—Horses, mules and oxen, and big wagons and little ones—everything that runs on wheels and everything that could haul it—were pressed into service yesterday hauling ore from the Raymond & Ely mine to the Raymond & Ely mills at Bullionville.

A REMOR.—It is whispered among the busybodies that a big party has been organized here to jump claims in Wallapai District. As the story goes, 100 teams will be sent out soon, carrying 200 miners and 100 fighting men. "Give us a rest."

STAMPEDERS are again moving towards Wallapai. We fear many of them will not realize their expectations in that section. Reports from there of late have uniformly been to the effect that there are many out of employment in Wallapai.

ALL THE Bullionville mills are running, but most of them on "tailings"—the ore supplies having run out, and it being impossible, owing to the present condition of the roads, to haul enough in for steady running.

E. MARTIN SMITH, one of the original locators of the Pioche mine, this district, is expected to soon arrive in Wallapai district with a 10-stamp mill. We are told that Col. Wm. H. Raymond is connected with him.

DISTRICT COURT was not in session yesterday. The Clerk and his Deputies were busily engaged copying, filing papers, entering judgments, etc. The Judge will to-day hear motions at chambers.

THE commemorative monument of the War Department is completed, but not yet put in position. It is on the hillside north of upper Meadow Valley street, near the spot where it will be erected.

THE Standard Mining Company have purchased some first-class hoisting machinery. It has been shipped from San Francisco, and in a short time will be at the mine ready to be placed in position.

DRAFTSMEN are at work, under the supervision of the County Surveyor, preparing plots of the city, preparatory to entering the town site. It is a job of no little magnitude.

THE Raymond & Ely Company have laid iron water-pipes from the hot spring, in the vicinity of Bullionville, through which an abundance of water is being conveyed to their mills.

COL. LIGHTNER has our thanks for California papers presented last night in advance of the mail. He arrived by private conveyance an hour in advance of the coach.

IN consequence of the illness of Mr. Egbert there will be no morning service in the Court House as announced. Service at 7:30 p. m. Sunday school at 2 p. m.

TO ARRIVE TO-DAY.—The following passengers left Hamilton yesterday, for Pioche, who will arrive by to-day's stage: M. Carrigan and wife, Wm. Wilson.

IF you know anything of general interest in regard to outside developments, call around to our editorial room and report.

THE choir of the newly organized Presbyterian church had a musical rehearsal in the District Court room last evening.

COUNTY SURVEYOR SCHOPPMANN is building a neat residence on Schoppmann street, opposite the Court-house.

THE water-haulers report the roads in a very bad condition between town and the five-mile wells—almost impassable.

COL. C. W. LIGHTNER arrived about three o'clock yesterday afternoon, and was welcomed by a host of old friends.

IMPROVEMENTS are being made on Ely street, leading up the hill from Main above the Record office.

THE Floral mill is now, and for several days has been, reducing Huhn & Hunt ore, with good results.

THERE is a dispatch at the Western Union telegraph office for Mrs. L. Cassidy.

RECKLESS shooting continues, but is not as frequent as it has been.

THE hose company had their regular monthly meeting last night.

STREET improvement continues.

More hay arrived yesterday.

Wood is declining in price.
